

GreenArrow CloudMTA at a glance

Email Delivery Service — SaaS Email Sending API

✓ Built for ESPs and Large Senders

Designed for the needs of ESPs and large senders. Full transparency on all deliverability details, and access to MTA settings if you want them.

✓ Escape Vendor Lock-In

Your customer's DNS setup will not lock you into our solution, and will reference your DNS hostnames, not ours. Full access to DKIM private keys.

✓ Hands-On Migration Assistance

We roll up our sleeves and work with you to accomplish a seamless migration to GreenArrow, covering both tech and deliverability.

✓ Support by Industry Veterans

Our team has a combined 150+ years in the email industry. We truly partner with our customers.

✓ Reliable and Scaleable

GreenArrow CloudMTA is the same software and architecture that has reliably sent billions of emails per day for our OnPrem senders.

✓ A Proven, Stable Partner

GreenArrow has delivered email for ESPs since 2006. We're not owned by an SMS company — we work for our customers.

✓ Future-Proof

You can always migrate to running GreenArrow MTA OnPrem on your own infrastructure, without having to change software.

✓ Superior Total Cost of Ownership

Competitive pricing, backed up by an experienced team and a powerful product.

"It's really a unique experience to work with such a knowledgeable and hands-on team with a system that performs really well. It's been great to partner with GreenArrow."

- Reba Moyes, Vero

"Working with the GreenArrow team has been an absolute treat."

- John Moody, Klaviyo

"GreenArrow deeply understands deliverability and email infrastructure. Every interaction, whether product, deliverability, or technical support, has involved someone who clearly knows their domain."

- Mike Arsenault,
Queen One / Rejoiner
